

Country	ICAO	Name	Plat.	Manufact	Version	Gates GSX2	Observations	Exclusion?	Jetaway type	Advertising	Procedure *	Marshall	Gate,A/C &Power unit	Errors
	<u>EDDB</u>	Berlin	P4D	AS	1.01	B4,B6,B10,B12,B14	in Chart Terminal D is B in the scenery	1.00	ThysenKrupp Apron drive, 3tunnel crystal 41/19	Globe Ground Berlin	1,2 and 3	Yes	Yes	With Procedure #1: 1. no fingers shown. 2.restart coatl once and they did show now. 3.open dialog for GSX2 and select option operate jetaways 4.ERROR:" No Jetaway to operate at thi position ". With Procedure #2 identical error on except that the created GateB10 does show but renders same error when jetway is operated. Procerdure #3 when editing the postion of the jetaway (i did this just to check that pressing 5 in the numeric key pad "PINGED", there is a white message saying " The Jetawaty (Custom GSX2) doesn't resolve with any door ". After exiting the edition of the jeataway, there is a message in white letters saying " this gate has a default jetway " (in the GSX2 Control panel, in P3D says that default jetaways have been deactivated by GSX)
	<u>EHAM</u>	Schipoll	P4D	FlyTampa	1.10	C6,C8,C10,C12		1.00	JBT Aerotech AT3 3Tunnel Crystal 47/85- 14/26m White livery	INGWORLD 3	1	Yes	Yes	Yesterday: No problem Today, without having touched a single thing in this airport error message: " No Jetaways can operate at this position " and this is one of the reasons why I say IS ERRATIC

Procedure 1 A) Selected all safegates a oncee, Jetaway exclude radius 1.00 selected,
B)Changed the name to Custom GSX2 for all of them, and chosen jetaway type, add, ..
C) Exit Simm with the GSX2 Control Panel open.
D) Pressed "Compile Check Ecludes". All **blue**
E) Enter the ariport on any of the modified gates to see if it works. Using a B737 pmdg with Ryanair livery.

Procedure 2 A) Selected 1 safegate at a time, Jetaway exclude radius 1.00 selected,
with the same B)Changed the name to Custom GSX2, and chosen jetaway type, add, ..
options as C) Exit Simm with the GSX2 Control Panel open.
in proc 1 D) Pressed "Compile Check Ecludes". All **blue**
(marshall, adv, E) Enter the ariport on the modified gate to see if it works. Using a B737 pmdg with Ryanair livery.
jetaway type)

Procedure 3 A) Selected 1 safegate at a time, Jetaway exclude radius 1.00 selected,
B) Exit Simm with the GSX2 Control Panel open.
C) Pressed "Compile Check Ecludes". All **blue**
E) Enter the sim in the ariport on the of the modified gate using a b737 pmdg
F)Changed the name to Custom GSX2 for all of them, and chosen jetaway type, add, ..

between test and test, I erased all the created files for the airfield in addon manager (2 files) and in Appdata (1 file)
